

CONTRIBUTION TO KNOWLEDGE OF ENORMOUS CHANGEABLE
EARTH'S MAGNETIC FIELDS (CEMF) INTENSITIES IN
ETIOPATHOGENESIS OF MENTAL DISTURBANCES AND
ILLNESSES (MDandI)

Eng. Nikola Trifunovic, Md.ph. Dragoslav Nikolic – research partners

This paper's aim is contribution to MDandI etiopathogenesis appeared under the influence of enormous CEMF intensities and explanation of central nervous system (CNS) operation from knowing the effect of natural physical fields on evolution of living world and CNS operation aspect. Correlation between enormous CEMF and MDandI was determined. Effect of enormous CEMF zones upon CNS had been revealed, and then the diseased was moved away from the enormous zones influence. Synthesis of two data groups was made. Processing the first data group correlation between present enormous CEMF zones and CNS of the diseased was determined. The second data group are theoretical explanations of unclearances found in literature concerning CNS from knowing the CEMF aspect. Coincidence of practical measuring results and theoretical explanations of almost all unclearances from the literature on CNS was determined.

It was concluded that enormous CEMF are the main cause of MDandI appearance and that moving the diseased away from enormous zones is a great help to the patient and his doctor in treatment.
